# 13250-1 Issues

JTC 1/SC 34 WG 3  
Seattle, Washington  
14-16 September 2009

# 1. Overall Structure

- Index examples that are domain specific
- Attempting to create a modular introduction
- Capable of using other examples from other domains
- To tailor the introduction to the specific interests of particular users
- To avoid “one size fits all” mentality

## 2. What Points Were Missed?

- Being mindful this is an introduction and not everything you wanted to know about topic maps, what needs to be added?

# 3. Example Topic Maps

- If examples are relevant to the reader, hesitate to toss out topic maps that are not.
- Should domain specific topic maps be extensions of the examples? (Available both in print form as well as electronically.)

# 4. Additional Resources?

- Listed all the other parts of the standard
- The mailing lists? (informative enough for new comers?)
- Example sites?

# 5. Modularity

- Suggestions for how to make the framework more modular. To facilitate the use of other examples.
