

TYPE: Single Control Character	REGISTRATION NUMBER : 66 DATE OF REGISTRATION: August 20, 1982
ESCAPE SEQUENCE: ESC 7/14	
<u>NAME</u> LOCKING SHIFT ONE RIGHT (LS1R)	
<u>DESCRIPTION</u> A code extension control function which is used in conjunction with other locking shift functions as specified in ISO 2022, to extend the graphic character set of an 8-bit code. LS1R is a locking shift function which invokes the set of graphic characters currently designated as a G1 set into positions 10/01 to 15/14. <i>NOTE - Although LS1R is not intended to be used in a 7-bit code, it may be encountered in a 7-bit environment as a result of transformation of data originating in an 8-bit environment. It then invokes the set of graphic characters currently designated as a G1 set, into positions 2/1 to 7/14.</i>
